We have defined “critical care medicine” as the triad of 1) resuscitation, 2) emergency care for life-threatening conditions, and 3) intensive care; including all components of the emergency and critical care medicine delivery system, prehospital and hospital.”

### **Critical Care Compendium (CCC) by LITFL**

Quotes. What information consumes is rather obvious: it consumes the attention of its recipients. Hence a wealth of information creates a poverty of attention, and a need to allocate that attention efficiently among the overabundance of information sources that might consume it.

### **Creativity, Thinking Skills, Critical Thinking, Problem**

Data quality refers to the condition of a set of values of qualitative or quantitative variables. There are many definitions of data quality but data is generally considered high quality if it is "fit for [its] intended uses in operations, decision making and planning". Alternatively, data is deemed of high quality if it correctly represents the real-world construct to which it refers.
