The New Report Wizard opens and the first step in the wizard allows for the creation of a data source. You will fill in the New Data Source Name and change the Type to Microsoft SQL Server Analysis Services.

Developing a SSRS report using a SSAS Data Source

SQL Server Reporting Services (SSRS) is an enterprise-class reporting platform that sits on top of well-established services in the Windows server technologies, including SQL Server, ASP.NET, and the Microsoft .NET Framework. One of the most compelling capabilities in SSRS is the ability to extend report features with custom code and programming extensions.

SQL Server Reporting Services (SSRS) Custom Programming

Matt. I am not sure about point number 8. PowerBI is not a self service tool yet, as far as i can see Microsoft still position Excel as the self service tool by choice, and just to be sure we are using the same definition, self service means no need for IT.
