Chairperson: John Borg, Ph.D., P.E. Mechanical Engineering Graduate Programs website. Degrees Offered. Master of Science, Master of Engineering; Doctor of Philosophy. Mission Statement. We immerse individuals in an active environment to cultivate broadly educated mechanical engineers who balance theory with practice for advancing knowledge, solving problems and serving society.

Undergraduate Study. The Department of Mechanical Engineering (MechE) offers three programs of undergraduate study. The first of these, the traditional program that leads to the bachelor's degree in mechanical engineering, is a more structured program that prepares students for a broad range of career choices in the field of mechanical engineering.

In engineering, electromechanics combines processes and procedures drawn from electrical engineering and mechanical engineering. Electromechanics focuses on the interaction of electrical and mechanical systems as a whole and how the two systems interact with each other.

Engineering ethics is the field of system of moral principles that apply to the practice of engineering. The field examines and sets the obligations by engineers to society, to their clients, and to the profession. As a scholarly discipline, it is closely related to subjects such as the philosophy of science, the philosophy of engineering, and the ethics of technology

Overview. The Drafting and Engineering Support curriculum is designed to prepare students for careers in industry as engineering support technicians who plan, prepare and interpret engineering sketches for design and drafting relative to mechanical and architectural designs, civil structures and developments, weldments, electronic circuits, or landscape architecture and design.

While our foundation has held firm, we pride ourselves on continuing to modernize the curriculum and our teaching practices. The prestigious 2016 Bernard M. Gordon Prize for Innovation in Engineering and Technology Education is a nod both to our history and to our future, recognizing WPI's project-based curriculum developing leadership, innovative problem-solving,

Engineering seeks to create new processes, products, methods, materials, or systems that impact and are beneficial to our society. To enable its graduates to lead the advancement of technology, the Case School of Engineering offers fourteen degree programs at the undergraduate level (twelve engineering degrees, plus the BS in computer science and the BS in data science and analytics).
