VIBE™ VIP320 MECHANICAL VIBRATION ISOLATION PLATFORMS

(PDF) PROBLEM SOLUTION TO MECHANICAL ENGINEERING

mechanical vibration solution manual pdf

Overview Featuring VIBe™ mechanical vibration isolation technology, VIP320 series platform is consisted of a stiff steel plate supported by VIB320 isolators. It provides superior mechanical vibration isolation capabilities both vertically and horizontally. Steel platform for isolating loads up to 300 lbs

The single-turn and multi-turn magnetic encoder line from BEI Sensors are ideal in environments where extreme temperatures and high shock/vibration are present.

Magnetic Encoder Products from BEI Sensors

A bushing or rubber bushing is a type of vibration isolator. It provides an interface between two parts, damping the energy transmitted through the bushing. A common application is in vehicle suspension systems, where a bushing made of rubber (or, more often, synthetic rubber or polyurethane) separates the faces of two metal objects while allowing a certain amount of movement.

The HXP50-MECA 6-Axis Hexapod is a parallel kinematic motion device that provides six degrees of freedom: X, Y, Z, pitch, roll, and yaw. The HXP50 has a 5 kg centered load capacity and is a cost-effective solution to complex motion applications that demand repeatability and accuracy in up to six independent axes.
