Treating MRSA Naturally During Pregnancy

INTRODUCTION. Worldwide, women are working during all trimesters of pregnancy for reasons including financial necessity, preservation of insurance, career advancement, and preservation of postpartum leave time.

UpToDate

Every pregnancy has some risk of problems. You may have problems because of a health condition you had before you got pregnant. You could also develop a condition during pregnancy.

Health Problems in Pregnancy | Gestational Diabetes

A disease is a particular abnormal condition that negatively affects the structure or function of part or all of an organism, and that is not due to any external injury. Diseases are often construed as medical conditions that are associated with specific symptoms and signs. A disease may be caused by external factors such as pathogens or by internal dysfunctions.

Disease - Wikipedia

Women who smoke have more difficulty becoming pregnant and have a higher risk of never becoming pregnant. 2,4 Smoking during pregnancy can cause tissue damage in the unborn baby, particularly in the lung and brain, and some studies suggests a link between maternal smoking and cleft lip. 1,2 Studies also suggest a relationship between tobacco and miscarriage.

Smoking During Pregnancy | CDC

The American College of Obstetricians and Gynecologists (ACOG) states that becoming overheated in a hot tub is not recommended during pregnancy. ACOG also recommends that pregnant women never let their core body temperature rise above 102.2° F.

Hot Tubs During Pregnancy: Safety Concerns and Health Risks

Miscarriage, also known as spontaneous abortion, is the unintentional expulsion of an embryo or fetus before the 24th week of gestation. A pregnancy that ends before 37 weeks of gestation resulting in a live-born infant is a "premature birth" or a "preterm birth". When a fetus dies in utero after viability, or during delivery, it is usually termed "stillborn".

Abortion - Wikipedia

Some women report using marijuana to treat severe nausea associated with their pregnancy; 105,106 however, there is no research confirming that this is a safe practice, and it is generally not recommended. Women considering using medical marijuana while pregnant should not do so without checking with their health care providers.

Can marijuana use during and after pregnancy harm the baby

Human chorionic gonadotropin (hCG) is a hormone produced by the placenta of a pregnant woman. Early in pregnancy, the level of hCG increases in the blood and is eliminated in the urine. A pregnancy test detects hCG in the blood or urine and confirms or rules out pregnancy. During the early weeks of pregnancy, hCG is important in maintaining function of the corpus luteum.
