Medical privacy or health privacy is the practice of maintaining the security and confidentiality of patient records. It involves both the conversational discretion of health care providers and the security of medical records. The terms can also refer to the physical privacy of patients from other patients and providers while in a medical facility. Modern concerns include the degree of ...

Flu Symptoms. Influenza (also known as flu) is a contagious respiratory illness caused by flu viruses. It can cause mild to severe illness, and at times can lead to death.

Flu Symptoms & Complications | CDC

INTRODUCTION. Patients 65 years and older represent nearly 40 percent of hospitalized adults and, in 2008, accounted for nearly half of all health care dollars spent on hospitalization, but comprised less than 13 percent of the population in the United States []. Those 65 years and older are hospitalized three times as often as those 45 to 64 years old [].
