BIOCHEMICAL CHARACTERISTICS OF THE HERB MIXTURE PROLIPID

medicinal substances in jerusalem pdf

Honey is a sweet, viscous food substance produced by bees and some related insects. Bees produce honey from the sugary secretions of plants (floral nectar) or from secretions of other insects (such as honeydew), by regurgitation, enzymatic activity, and water evaporation. Bees store honey in wax structures called honeycombs. The variety of honey produced by honey bees (the genus *Apis*) is the ...

MYRRH – COMMIPHORA CHEMISTRY

Myrrh (/ m ??r /; from Aramaic, but see § Etymology) is a natural gum or resin extracted from a number of small, thorny tree species of the genus *Commiphora*. Myrrh resin has been used throughout history as a perfume, incense, and medicine. Myrrh mixed with wine can also be ingested.

Les cannabinoïdes sont un groupe de substances chimiques qui activent les récepteurs cannabis présents dans le corps humain et chez les mammifères.. Le premier cannabinoïde isolé fut le tétrahydrocannabinol, puis le cannabidiol et les autres cannabinoïdes. Ces découvertes ont été initiées et effectuées dans les années 1960 par le Pr. Raphael Mechoulam, chercheur israélien.
