PRIMING (PSYCHOLOGY) - WIKIPEDIA

memory psychology and second pdf

Sensory memory holds sensory information less than one second after an item is perceived. The ability to look at an item and remember what it looked like with just a split second of observation, or memorization, is the example of sensory memory.

Memory - Wikipedia

Priming is a technique whereby exposure to one stimulus influences a response to a subsequent stimulus, without conscious guidance or intention. For example, the word NURSE is recognized more quickly following the word DOCTOR than following the word BREAD. Priming can be perceptual, semantic, or conceptual. Research, however, has yet to firmly establish the duration (a day? a week?) of priming ...

JOURNAL OF VERBAL LEARNING AND VERBAL BEHAVIOR 11, 671-684 (1972) Levels of Processing: A Framework for Memory Research1 FERGUS I. M. CRAIK AND ROBERT S. LOCKHART University of Toronto, Toronto 181, Ontario, Canada This paper briefly reviews the evidence for multistore theories of memory and points out some difficulties with the approach.

Levels of processing: A framework for memory research

Short term memory is the ability to keep information in mind for a short amount of time. Remembering a phone number long enough to find a piece of paper is an example. The brain keeps information in its short term memory for a small period of time. The amount of time the mind is able to do this is usually some seconds.
